Webiators GeoIP Redirection & Locker

How to Install: Download the "Ready to paste" package from your customer's area, unzip it and upload the all files in 'app/code/Webiators/GeoIpRedirection' folder to your Magento install dir.

Update the Database: Move to Magento Root directory with CLI and use below commands

- php bin/magento setup:upgrade
- php bin/magento cache:flush
- php bin/magento setup:static-content:deploy

How to Use : Go to Store->Configuration->Webiators->Geo IP Enable

GeoIp Lock if you want to avoid visitors from selected countries.
Enable Geo IP Redirection If you want to redirect Visitors to specific country' Store
NOTE FOR REDIRECTION: if you want the redirection to work you have to Make you Store View Code as Country code.
Example: For **United State of America** Store code will be **US**
         For **India** Store code will be **IN**

NOTE: This module not work until you insert API KEY. You will find your free API KEY from https://ipstack.com/
